Gopal ji Gupta

Kanpur, Uttar Pradesh | gopalgupta46300@gmail.com |+918052801066 | Github| LinkedIn |

Technical Skills

- **Programming:** Python (Pandas, NumPy, Scikit-learn)
- **Machine Learning:** Supervised & Unsupervised Learning, Deep Learning (TensorFlow, Keras), and NLP
- **Data Analytics:** Data Collection, Preprocessing, Exploratory Data Analysis (EDA)
- **Data Visualization:** Power BI, Matplotlib, Seaborn
- **MLOps & Deployment:** Flask, FastAPI, and Streamlit
- **Spreadsheet & Reporting:** MS Excel (Pivot Tables, VLOOKUP, Power Query, Macros)
- **Soft Skill:** Having leadership quality, decision making, and team work

---

Achievements

Introduction to Artificial Intelligence

Infosys Springboard | July 2025

- Completed foundational training in Artificial Intelligence concepts, machine learning basics, and realworld AI applications Conferences & Academic Participation

I**nternational Conference on Mathematics and Logics in Computer Science (ICMLCS-25)**

Allenhouse Institute of Technology, Kanpur | July 2025

- Participated in an international academic conference focused on mathematics, logic, and CS applications. Engaged with research discussions on mathematical modeling and computational logic.
- **Internal Smart India Hackathon 2025 – Participant**

Smart India Hackathon 2025 | Allenhouse Institute of Technology | September 2025

- Participated in a national-level innovation hackathon focused on solving real-world technological problems. Collaborated in a team environment to brainstorm and develop technology-driven solutions.
-

Projects

Iris Dataset Classification:

Developed a machine learning model using Logistic Regression, achieving **85% accuracy** for species classification.

Email Spam Detection:

Implemented an NLP-based spam detection model using Naive Bayes and SVM, achieving **92% accuracy** in classifying emails.

TrainingAI with Kaggle – 5 Day BootcampKaggle | December 2025

- Participated in a 5-day hands-on training program focused on Artificial Intelligence and machine learning workflows.
- Worked with real-world datasets using Python, Pandas, and machine learning models.

Data Structures & Algorithms Practice

- Solved 100+ algorithmic problems covering arrays, strings, hashing, recursion, and data structures.
- Achieved 80% performance beat rate compared to other submissions.

Education

Bachelor of Technology — *Allenhouse Instutite of Technology, Kanpur*

– *CSE- AIML*
